New Eurozine associate: ICORN

Eurozine welcomes ICORN, the International Cities of Refuge Network, as an associate.

ICORN is an independent, international organization of member cities offering refuge for persecuted writers. Run from Stavanger, Norway, ICORN consists of more than 30 member cities in Europe and beyond. It invites persecuted writers to dwell in a safe haven where they can express themselves freely, without fear of being censored or silenced.

Each member city hosts one writer at a time, each writer representing the countless others in hiding, in prison or silenced forever. By providing a guest writer with a safe place to stay and economic security for two years, ICORN cities make an important and practical contribution to the promotion of freedom of expression.
